To League of Young Communists USA

Dear comrades of the LYC(USA)

The Communist Youth of Denmark extends our warmest greetings of solidarity, in advance of your upcoming 2nd congress, on Saturday 27th of August.

Our organizations met briefly at the Avante! festival in Portugal, in September of 2021. There we held a bilateral meeting, and had a very productive talk. The fact that you, and your mother party the PCUSA, had broken away to form an anti-revisionist movement, was very inspiring. Also, your form of organization, being the way you form various committees to get in contact with the masses, was very inspiring.

It is no secret that the organizational matters can be very difficult and time consuming in the communist movement of today, when there's no Internationale or CPSU to receive help from. That's why we have to constantly struggle to form an organization in accordance with the mass line, and a leadership that doesn't stray away from the Marxist-Leninist principles. We hope that your 2nd congress will strengthen the unity of your organization, and sharpen the ideological firmness of everyone.

In the future, in spite of some practical difficulties, we hope to extend the cooperation between the two of our organizations. We believe that such cooperation will be of important mutual experience that can strengthen us in these times of uncertainty.

No matter what, we can't disappoint the masses. In these times of intensifying imperialist conflicts, great climate catastrophes and increasing inflation, we must act quick and struggle resolutely to form a strong vanguard party.

Long live the anti-imperialist cause!  
Long live the struggle for justice and socialism!  
Long live the unity of the international working class!

Militant Greetings,

Nikolai Aamand  
*Secretary of International Affairs of the  
Communist Youth of Denmark*
